

## Cloud Storage

Content storage via myDIGITUS Cloud. You can access to your video content anytime and anywhere. The connection takes place over a secure P2P connection.

## Wireless LAN

You can assign a fixed IP-address to the camera to connect it to the Wireless LAN.

## H.264

The compression method H.264 generates with less data volumes higher quality images.

## Motion Detection

The camera is equipped with a video motion detection.

## Smart Phone App

With the mobile „DIGITUS® Plug&View App“ for iOS and Android, you are able to monitor your home remotely on the way.

## Smart Light Control

Smart Light Control is an additional camera function to minimize overexposure. So you can get perfect images even with insufficient lighting.

## Power Over Ethernet

You need no further power cable. The power supply is provided via network cable. Often reduces installation cost.

## Shift & Tilt

The shift and tilt function of the camera can be handle by web interface or app.

## Zoom Control

The camera zoom can be set individual

## Weather Proof

This camera is extreme heat-, cold- and UV-resistant. So it is optimally suitable for outside use.

## Vandal Proof

Thanks of their extreme robust casing, the camera is protected against vandalism.

## Internal Storage

An internal storage in the camera stores your video content.

## SD-CARD Local Storage

Insert a SD-Card into the camera to store your video content local.
